

Blue Moon Fighter instructions

step 1

Blue Moon Fighter

An important thing to look out for with *Fighters* in the 2001 Game Boy Advance turn-based strategy game *Advance Wars*, is their fuel supply.

Sometimes a good tactic is to simply block an enemy *Fighter's* path with one or more ground units, so it can't reach an APC or friendly Airport in time to be re-supplied and will simply fall from the skies and crashes when it runs out of fuel...

Print the parts on thicker paper, and gather your papercrafting tools! ;o)

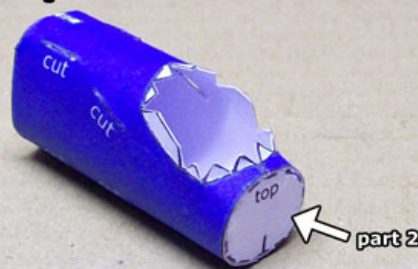

p. 1/2

step 2

Cut out the 8 small slits on part 1, and then pre-shape and glue it together as shown here. Don't forget to glue together the front too!

step 3

Glue part 2 to the front of part 1 (align the line with the seam on the bottom of part 1).

step 4

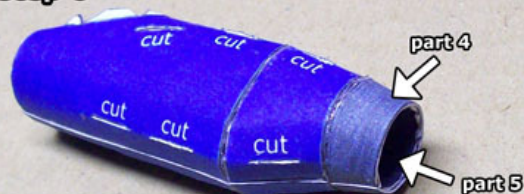

Cut out the 4 small slits on part 3, glue it together, and then shape the open end so it fits the backside of part 1.

step 5

Assemble parts 4 and 5 (part 5 with the coloured side in!)...

step 6

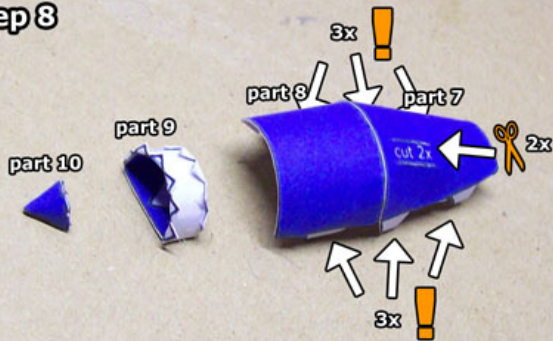

...then glue part 5 inside part 4, and glue both parts to the back of part 3 as shown here.

step 7

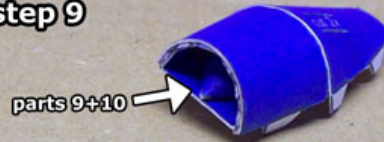

Assemble part 6, and then shape it so you can glue it to the front as shown here.

step 8

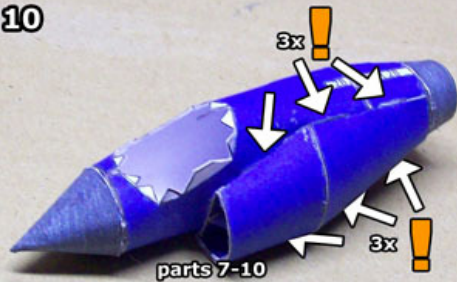

Cut out and glue together parts 7-10: cut out the 2 small slits on part 7, and DON'T score or fold the 6 larger glueing tabs on parts 7 and 8! Part 9 needs to be assembled with the coloured side in!

step 9

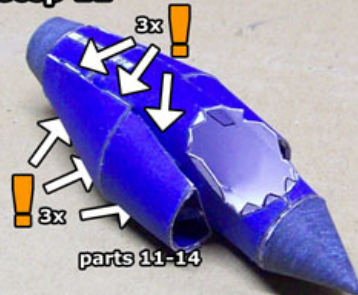

Take your time to shape and glue everything together...

step 10

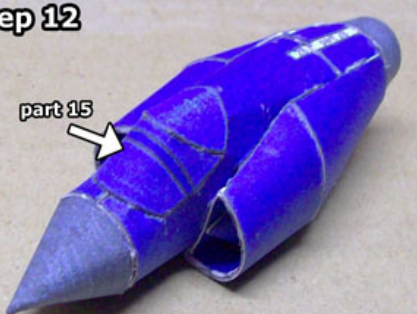

...and then glue parts 7-10 to the side of the hull, by pushing the glueing tabs through the slits (take your time).

step 11

Then do the same for parts 11-14 on the other side.

step 12

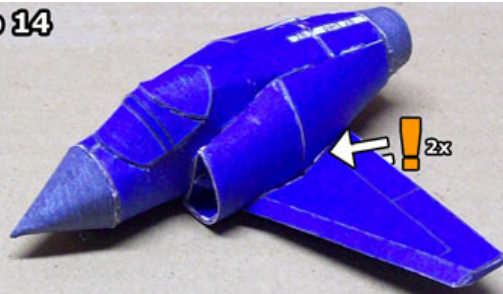

Assemble part 15, and then glue it into place as shown here.

step 13

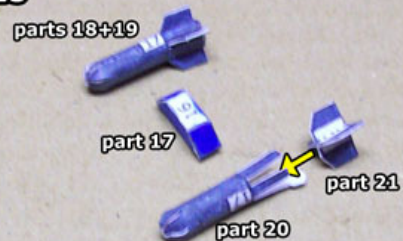

Cut out and assemble part 16, but DON'T score or fold the 2 bigger glueing tabs!

step 14

Push the two glueing tabs through the slits on part 7 to glue the wing to the rest of the plane. Push it against the hull firmly and hold it until it's dried, so there won't be any gaps.

step 15

Assemble parts 17-21 (glue parts 19+21 into a cross-shape, and slide them through the slits on parts 18 and 20 before closing the bottoms)...

step 16

parts 17-21

..and then glue parts 17-21 underneath the wing as shown here.

step 17

parts 22-27

2x !

Do the same for parts 22-27 on the other side.

step 18

Take your time to score and fold part 28, following the outlines of the sides...

step 19

Blue Moon
Fighter

...and then glue it together and on top of the hull as indicated.

Thank you for building a Ninjatoes' papercraft model!
